# IP ADVANCED RADIO SYSTEM

## Full-Duplex Communication That Works Over a Wireless LAN and IP Network

### System Features

#### Wireless Communication System among Ship Crews

By installing wireless access points, the IP advanced radio system can flexibly deploy along the IP network and communicate throughout in the vessel. The IP100H can access the nearest access point and can roam between access points.

#### Hands-free, Full-duplex Communication

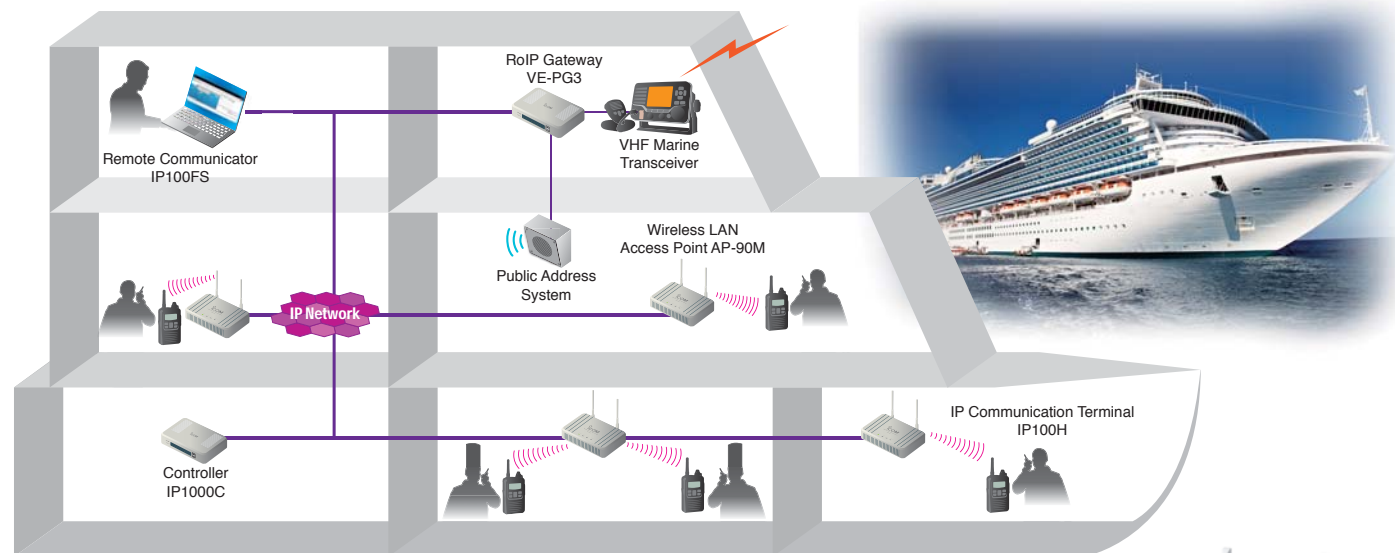

With optional earphone-mic or headset HS-102 or HS-85\*, the IP100H user can simultaneously talk and receive like a phone call. Hands-free operation allows your staff to carry out other tasks at the same time.  
\* Either HM-153LS, HM-166LS, HS-102 with OPC-2359 or HS-85 with OPC-2144 is required.

#### Individual, Group or Area Communication

The IP100H/IP100FS can make individual call, group conference call, all call and area call. Crews spread across multiple rooms and cabins can communicate seamlessly. The IP communication terminal can receive Short Data Messages with a vibration alert from a PC installed IP100FS.

#### Interconnect between VHF Marine Transceiver and Public Address System

With the VE-PG3 RoIP gateway, the IP advanced radio system can interconnect with a VHF marine transceiver, other radio system and a public address system.

#### IP Communication Terminal **IP100H**

- Licence-free communication terminal using IEEE 802.11 a/b/g/n standards
- WPA-PSK or WPA2-PSK encryption
- IPX7 waterproof (1 m depth water for 30 minutes)
- Compact 58 x 95 x 26.4 mm body and 205 g (approximate) lightweight
- Vibration alert function for incoming calls

#### Wireless LAN Access Point **AP-90M**

- IEEE 802.11 a/b/g/n/ac compliant
- PoE (Power over Ethernet) capability
- Optional RS-AP3, access point management software

#### Controller **IP1000C**

- The IP1000C controls all terminal configurations and voice traffic
- Capable of controlling up to 100 or 20\* terminals (including IP100FS)
- \* Depending on version.

#### RoIP Gateway **VE-PG3**

- Interconnects IP advanced radio system and other radio system\*
- Public address system connection
- Telephone interconnection with IP phone and PSTN lines

\*Interconnection with VHF marine radio may be prohibited in some countries. Please confirm legal requirements in your country before installation.

#### Remote Communicator Software **IP100FS**

(Supplied with USB flash drive for use as a USB hardware key)

- The IP100FS can communicate with IP communication terminals from a PC
- The IP100FS can obtain location information of each IP100H based on using access points
- Can be installed to a Windows® based tablet PC as well as laptop PC

# MarineCommander™

## Command – Your Way, Communications and Navigation Setup

### System Overview

The MarineCommander™ is Icom's marine navigation system, which integrates various marine modules such as a fish finder, marine radar, AIS and VHF transceiver into the multi-function display (MFD).

#### Affordable Dual Display Connection Up to Four Displays in a System

The MarineCommander allows you to connect two MFDs simultaneously. All connected modules including chart data, fish finder and marine radar can be shared with two MFDs and provide separate operation. When connecting two MarineCommanders via a data cable, up to 4 displays can be used and C-MAP™ chart data can be shared in the system.

#### Daylight Viewable Display

The 12.1 inch size MFD provides 800 x 600 pixels resolution. The 900 cd/m<sup>2</sup> high brightness, colour LCD with anti-reflecting surface coating glass offers bright, vivid indication in detail even in under direct sunlight.

#### C-MAP™ MAX Compatible

The MarineCommander is compatible with the C-MAP™ MAX chart by C-MAP Italy S.r.l. in an SD card format\*. The MarineCommander provides quick and fast responding rendering performance. The C-MAP™ MAX chart provides guardian alarm, route-check, perspective view and Port database for your safe and easy navigation.

\* Chart data is not supplied from Icom.

## Marine Radar

The MXR-5000R/T marine radar provides clear target discrimination. Waypoint and AIS target can be overlaid on the radar screen. The marine radar helps collision avoidance and increases your safety at sea. The radar images can be overlaid on the plotter screen in the same scale and help you to detect dangerous objects.

ATA list

### Simplified ATA (Automatic Tracking Aid)

The simplified ATA function allows you to plot up to 10 targets and the radar continues to track the targets automatically. The ATA targets can be overlaid on the plotter screen.

### MARINE RADAR MXR-5000T

- 4 kW, 4 feet (120 cm) open array scanner
- Up to 48NM observation • 48 rpm high rotation speed

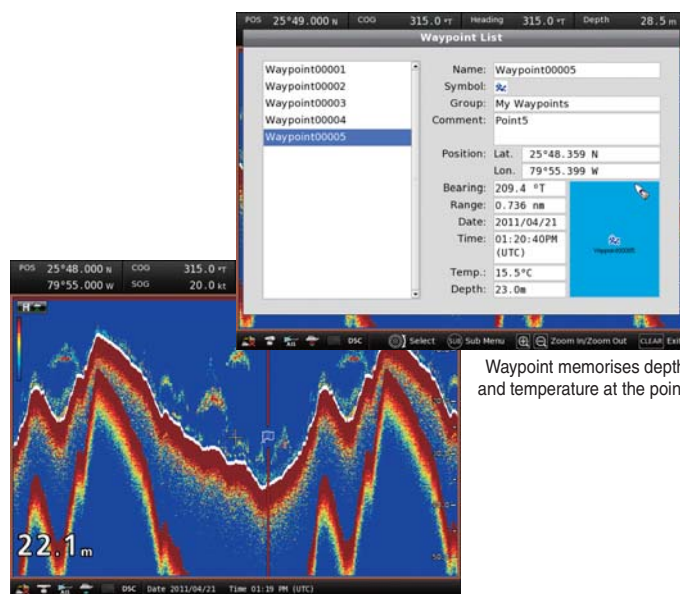

### MARINE RADAR MXR-5000R

- 4 kW, 2 feet (60 cm) radome scanner
- Up to 36NM observation • 48 rpm high rotation speed

## Fish Finder

When a fish finder module is connected, the MarineCommander system can have a dual frequency sounder function. Using the 50 kHz/200 kHz dual frequency mode, the MarineCommander enhances the separation and helps in fish detection.

Sounder screen

### Additional data for waypoints

When used with the fish finder module, the MarineCommander memorizes the waypoint information with depth and temperature data.

### FISH FINDER MXF-5000

#### EX-3193
